WASHINGTON DC 20310

JAN 05 2007

MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Army Server Consolidation Business Case Analysis: Army Enterprise Transformation

1. The Army is rationalizing its IT investments through the use of Information Technology Portfolio Management (IT PfM) as established in the July 20, 2005, Army Knowledge Management (AKM) Guidance Memorandum entitled Capabilities-Based Information Technology (IT) Portfolio Governance. As the Army eliminates redundancies in software systems, it must also analyze the IT infrastructure. Mission Area and Domain Transformation Plans include the concept of server consolidation.
2. After reviewing these Transformation Plans, the CIO/G-6 has identified the consolidation of server farms as an FY07 objective. The CIO/G-6 will lead a business case development team with members of Mission Areas and Domains to determine potential efficiencies and processes for consolidating servers into server farms with a business objective of decreasing cost of operation and increase system security and performance.
3. Server consolidation is a challenging initiative and will require a dedicated team effort to ensure that the Army fully realizes significant benefits.

Thomas E. Kelly III  
Deputy Under Secretary  
of the Army

James J. Lovelace  
Lieutenant General, U.S. Army  
Deputy Chief of Staff, G-3/5/7
